

**Project Design Phase-II**  
**Technology Stack (Architecture & Stack)**

Date	18 October 2022
Team ID	PNT2022TMID01909
Project Name	Gas leakage monitoring and alerting system
Maximum Marks	4 Marks

**Technical Architecture:**

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

**Table-1 : Components & Technologies:**

S.No	Characteristics	Description	Technology
1.	Open-Source Frameworks	MIT app,Node-Red	Software
2.	Scalable Architecture	Application can also be developed in future by integrating more number of equipments to measure various parameters,	Hardware(arduino,sensors)
S.No	Component	Description	Technology
1.	User Interface	How user interacts with application e.g. Web UI, Mobile App, Chatbot etc.	MIT app

2.	Application Logic-1	Logic for a process in the application	Node red/IBM Watson/MIT app
3.	Application Logic-2	Logic for a process in the application	IBM Watson STT service
4.	Application Logic-3	Logic for a process in the application	IBM Watson Assistant
5.	Database	Data Type, Configurations etc.	MySQL, NoSQL, etc.
6.	Cloud Database	Database Service on Cloud	IBM DB2, IBM Cloudant etc.
7.	Gas sensor	Monitors the gases	
8.	GSM module	Short messaging services alert	.
9.	Buzzer	Gives an audible sign of the presence of gas.	

**Table-2: Application Characteristics:**

3.	Performance	Measure or monitor that depletion of combustible gases,toxic gases within an area as part of a safety system	Hardware
